RF VENUE DIVERSITY FIN - \$629

Polarization Diversity Antenna

The patented Diversity Fin is a multi-purpose antenna for wireless microphones that reduces dropouts using a cross-polarized, hybrid design. It combines one LPDA and one dipole antenna in an orthogonal (right angle) configuration. One element captures vertically polarized waves, and the other horizontally polarized waves—doing the same job as two “shark fin” paddles while greatly improving RF and audio performance.

To use, just connect both the A and B outputs on any antenna distributor or microphone receiver and point toward the stage.

The Diversity Fin has found widespread adoption across multiple pro audio segments for its performance, convenience, space, and cost benefits. From high profile live sound events, to film and TV productions, to routine installations in schools and churches, the Diversity Fin is the ideal all-purpose external antenna for diversity microphone systems of any brand.

- 10' RG8X Coaxial Antenna Cable - \$79 - two required
- 15' RG8X Coaxial Antenna Cable - \$95 - two required
- 25' RG8X Coaxial Antenna Cable - \$119 - two required
- 50' RG8X Coaxial Antenna Cable - \$199 - two required
- 75' RG8X Coaxial Antenna Cable - \$269 - two required
- 100' RG8X Coaxial Antenna Cable - \$319 - two required

Pakedge SE-26 26-Port Unmanaged gigabit Ethernet Switch - \$325 for use with Sennheiser WSM Wireless Systems Manager free software

Your 5% Instant Bonus may also be used towards **Point-Source Audio microphones, a rack or XLR mic cables.**
